PROJECTS

DISASTERLENS — AI-BASED NATURAL DISASTER PREDICTION

Python, Flask, SQLite, scikit-learn, SHAP | 2025

- Developed and trained **scikit-learn** machine learning models to predict natural disasters, deployed through a **Flask** REST API.
- Integrated **real-time Weather API** and **News API** to enhance predictions with live environmental and disaster-related data.
- Optimized model deployment by serializing trained models as **pickle (.pkl)** files for fast and consistent inference.
- Built REST API endpoints, evaluated model performance, and managed model versioning and data storage using **SQLite**
